PREPARED FOR APEX EPOXY

Your Website Is Live.
Here's What Comes Next.

A step-by-step growth roadmap for Apex Epoxy & Surface Systems — from day one to dominating the Cypress & Houston market.

Prepared March 29, 2026 — QuickLaunchWeb

WHERE YOU STAND TODAY

You're Already Ahead of Most

What Your Website Already Does Well

Your site is live, it's fast, and it looks like a real business — not a side hustle. That puts you ahead of the majority of new epoxy contractors in Houston who are running off Facebook pages and Craigslist ads. Here's what's working:

- ✓ **Professional first impression** — dark, premium design with gold accents instantly communicates quality. Visitors trust you before reading a word.
- ✓ **Mobile-optimized** — over 70% of local searches happen on phones. Your site looks great on every screen size.
- ✓ **Fast loading** — slow sites lose 53% of visitors. Yours loads quickly, keeping potential customers engaged.
- ✓ **Clear services & pricing guidance** — you list four distinct services with detailed descriptions, and your FAQ includes real pricing ($1,800–$3,500 for a 2-car garage). Almost no competitor does this. It builds instant trust.
- ✓ **Strong calls-to-action** — phone number and estimate form are visible everywhere. No visitor has to hunt for how to contact you.
- ✓ **SEO foundations in place** — proper page title, meta description, schema markup (LocalBusiness + FAQPage), and 15 service area cities named. Google can read and understand your site.
- ✓ **Comparison table** — your Apex vs. DIY vs. Handyman table is a conversion weapon. It reframes the buying decision in your favor before the customer even calls.

Bottom line: You have a legitimate business presence online. When someone Googles "epoxy flooring Cypress TX" and lands on your site, they're seeing a company that looks established and trustworthy. That's the foundation everything else builds on.

YOUR MARKET AT A GLANCE

Who You're Competing Against

The Cypress/Houston epoxy market has 8+ active players. Here's a quick snapshot of the competitive landscape so you know what you're up against — and where the opportunities are.

COMPETITOR	WARRANTY	KEY DIFFERENTIATOR	YOUR ADVANTAGE OVER THEM
Floor Shield Houston	15-year	Polyaspartic-only, veteran-led, same-day install	You offer both epoxy + polyaspartic (more options). Their website looks dated.
Mach One Epoxy	Lifetime	5.0 stars (71 reviews), military branding, enterprise clients	They don't target Cypress specifically. You're local to their gap.
Garage Experts (Franchise)	Lifetime	National brand, cabinets + floors, polished website	They're a franchise — no owners on-site. You're the real deal, not a logo.
Sunflower Coatings	10-year	Online estimator, 1-day install, polyaspartic-only	Spread thin across many cities. You own Cypress.
Coat My Slab	10-year	18+ years in business, widest service menu	Your site and branding already look more modern and premium than theirs.
Epoxy Floors Houston	Varies	0% financing, $150 coupon, statewide coverage	You're owner-operated and local. They're volume players.

The takeaway: Most of these companies have been around for years, but almost all of them have mediocre websites and rely on reviews + Google Business Profile to drive leads. The path to competing with them isn't about outspending them — it's about being more visible, more trustworthy, and more strategic online. That's exactly what this roadmap covers.

01 NOW — FIRST 30 DAYS

Google Business Profile: Your #1 Growth Lever

This is the single most important thing you can do right now. Your Google Business Profile (GBP) is how you show up in the local map pack — those top 3 results with the map that appear when someone searches "epoxy flooring near me." **This is where 80%+ of local leads come from.**

Set Up Your GBP the Right Way

If you haven't already, claim and verify your Google Business Profile at **business.google.com**. Then optimize every single field:

1. **Business name:** Use your exact business name — "Apex Epoxy & Surface Systems." Don't keyword-stuff it (Google penalizes this).
2. **Primary category:** Set to **"Epoxy Floor Coating Service"** — this is the most specific category available and directly matches buyer intent.
3. **Secondary categories:** Add "Floor Coating Contractor," "Concrete Contractor," and "Flooring Contractor." These capture additional search queries.
4. **Service area:** Add every city you serve — Cypress, Houston, The Woodlands, Katy, Spring, Tomball, Sugar Land, Pearland, Friendswood, League City, Humble, Kingwood, Conroe, Richmond. Google shows your listing to searchers in these areas.
5. **Business description:** Write a 750-character description that naturally includes your key services and cities. Lead with what makes you different: "Owner-operated epoxy flooring company based in Cypress, TX. Beau & Haden are on every job..."
6. **Services:** Add each service individually — "Flake Epoxy Garage Floors," "Metallic Epoxy Floors," "Commercial & Warehouse Coatings," "Patio & Outdoor Coatings." Include a short description and price range for each.
7. **Attributes:** Enable every relevant attribute — "Veteran-led" (if applicable), "Locally owned," "Free estimates," "Online appointments."
8. **Photos:** Upload at least 10 real project photos immediately. Google prioritizes listings with more photos. Include: your logo, a team photo of Beau & Haden on a job site, 3+ before/after shots, close-ups of flake & metallic finishes, and 1-2 exterior shots of homes you've worked on.

The Review Strategy That Wins

Reviews are the #1 ranking factor for the local map pack — and the #1 trust signal for buyers. Your competitors have years of reviews. You need to close that gap fast.

Your target: 25 five-star reviews in 90 days. That's roughly 2 reviews per week. This alone will transform your GBP visibility.

- ✓ **Create a review link shortcut:** In your GBP dashboard, go to "Ask for reviews" to get your direct review link. Save it in your phone and share it after every job.
- ✓ **Ask at the right moment:** The best time is during the final walkthrough when the customer is seeing their new floor for the first time and they're excited. Say something like: *"We're a new local business trying to build our reputation — if you're happy with the floor, a Google review would mean the world to us."*
- ✓ **Follow up by text:** 24 hours after the job, send a quick thank-you text with the direct review link. Keep it personal and short.
- ✓ **Respond to every single review:** Thank each reviewer by name. Mention the specific service ("Thanks for trusting us with your garage floor!") and reference their city ("Great working in the Katy area"). This signals to Google that you're active and local.
- ✓ **Never offer incentives for reviews:** It violates Google's terms and can get your profile suspended. Just ask genuinely and make it easy.

GBP Weekly Habits That Boost Ranking

Google rewards active profiles. Build these into your weekly routine:

POST WEEKLY UPDATES

Use GBP's "Updates" feature to post once a week. Cycle through these types:

- **Project showcase** — before/after photo with a short caption ("Just finished this 3-car garage in Cypress — full flake system with polyaspartic top coat")
- **Offers** — "Free estimates this week for Katy homeowners"
- **Educational tips** — "Why 100% solids epoxy lasts 5x longer than big box kits"
- **Team photos** — Show Beau & Haden on the job site

UPLOAD NEW PHOTOS REGULARLY

Add 2-3 new photos every week. Google tracks photo upload frequency as a ranking signal. Tips:

- Take photos of every single job (before, during, and after)
- **Geo-tag your photos** — make sure location services are on when you take them. This ties photos to the service area.
- Use descriptive file names before uploading: *"flake-epoxy-garage-floor-cypress-tx.jpg"*
- Variety matters — show different services, different homes, close-ups and wide shots

GBP Ranking Signals — What Actually Matters

Google ranks local map pack results based on three factors. Here's how to win each one:

RANKING FACTOR	WHAT IT MEANS	WHAT YOU SHOULD DO
Relevance	How well your profile matches the search query	Fill out every field. Use specific service names. Write a keyword-rich description. Add all categories.
Distance	How close you are to the searcher	You can't change your location — but adding all service area cities tells Google where you work. Mention city names in posts and review responses.
Prominence	How well-known and trusted your business is online	Get more reviews (volume + recency). Post weekly. Get listed on Yelp, BBB, Angi, and HomeAdvisor. Make sure your name, address, and phone (NAP) are consistent everywhere.

Pro tip — NAP consistency is critical: Your business name, address, and phone number must be exactly the same on your website, GBP, Yelp, Facebook, and every directory listing. Even small differences ("Suite 100" vs "Ste 100") can confuse Google and hurt your ranking. Pick one format and use it everywhere.

02 MONTHS 1–3

Build Social Proof That Sells for You

Right now, your website tells visitors you're great. But there's no outside proof. Every top competitor in your market uses social proof as their #1 conversion tool. Here's how to build yours from scratch.

Document Every Single Job

Starting now, treat every project like a case study. This content becomes your most powerful sales tool over time.

- ✓ **Before photo** — the ugly "before" is what makes the "after" stunning. Cracks, stains, oil spots — capture it all.
- ✓ **During photo** — shows the process and craftsmanship. Grinding, coating, flake broadcast.
- ✓ **After photo** — the money shot. Clean, glossy, beautiful. Multiple angles. Get one with the garage door open and natural light.
- ✓ **Short video clips** — even 15-second phone clips of the finished floor with overhead lights on are powerful on social media.
- ✓ **Customer quote** — ask the homeowner for a one-sentence reaction. Write it down. Get permission to use it.

Storage tip: Create a shared Google Photos album called "Apex Projects." Drop every photo there immediately. Tag by city and service type. In 3 months you'll have a library that most 5-year-old companies would envy.

Get Listed on Key Directories

Beyond Google, make sure Apex is listed on the platforms homeowners actually use when hiring contractors:

1. **Yelp** — create a free business page. Many homeowners cross-check Yelp.
2. **Facebook Business Page** — even if you don't post daily, having a page with your info and reviews matters for trust and GBP prominence.
3. **Nextdoor** — hugely powerful for local contractors. Neighbors recommend businesses here constantly.
4. **BBB (Better Business Bureau)** — signals legitimacy. Even a free listing helps.
5. **Angi / HomeAdvisor** — optional, but they drive leads in the home services space.

Remember: Keep your NAP (Name, Address, Phone) identical on every single listing. This consistency is one of the strongest signals Google uses to rank your Business Profile.

BUILDS OVER TIME | COMPOUNDS MONTHLY | FREE OR LOW COST

03 MONTHS 3–6

Content That Captures Search Traffic

Right now you have a single-page website — which is perfect for getting started. But as your business grows, expanding to multiple pages unlocks search traffic your competitors are capturing today.

Where Customers Are Searching (That You're Not Showing Up)

These are real searches happening in your market every month. Each one is a potential customer — and right now, your competitors are the ones showing up.

WHAT PEOPLE SEARCH	INTENT	COMPETITION	OPPORTUNITY
"metallic epoxy floor Houston"	Ready to buy	Medium	Dedicated metallic epoxy page would rank
"epoxy flooring Houston TX"	Ready to buy	High	Houston-specific landing page
"patio coating Cypress TX"	Ready to buy	Low	Almost no one targets this — easy win
"polyaspartic vs epoxy garage floor"	Researching	Low	Educational blog post = free traffic
"epoxy floor cost Houston"	Ready to buy	Medium	You already mention pricing — expand it into a full page
"commercial epoxy flooring Houston"	Ready to buy	High	Dedicated commercial page needed
"garage floor coating Katy TX"	Ready to buy	Medium	City-specific page for Katy

Each of these keywords represents a dedicated page on your website that could rank on Google and bring in leads every month. One page = one keyword target = one new stream of traffic.

The Website Growth Path

When you're ready to expand beyond your current single page, here's the priority order based on what will drive the most leads:

1. **Before/After Gallery page** — visual proof converts browsers into callers. This is the #1 page visitors want to see on a contractor's site.
2. **Individual service pages** — a dedicated page for each service (Flake Epoxy, Metallic, Commercial, Patio) with unique content. Each page targets different search terms.
3. **About / Our Story page** — Beau & Haden's story is your competitive moat. No franchise can replicate "owners on every job." This page builds the emotional connection.
4. **City landing pages** — dedicated pages for Houston, Katy, The Woodlands, etc. Each targets "[service] + [city]" search terms. This is how your competitors capture traffic across the metro.
5. **Blog / Educational content** — "How Much Does Epoxy Flooring Cost?", "Polyaspartic vs Epoxy: Which Is Better?", "How to Maintain Your Epoxy Floor." These attract people researching before they buy.

REVENUE DRIVER | SEO GROWTH | LONG-TERM TRAFFIC

04 MONTHS 6–12

Advanced Growth Moves

Once your foundation is solid — GBP optimized, reviews coming in, content growing — these are the moves that separate the top 10% of contractors from everyone else.

CONVERSION UPGRADES

- **Online estimator** — let visitors get a ballpark quote instantly (only one competitor does this)

REPUTATION & AUTHORITY

- **Video testimonials** — 30-second phone videos of happy customers are worth more than 100 written reviews

- **Financing option** — partner with Wisetack or Hearth to offer 0% APR. Removes the biggest objection: "I can't afford it right now."
- **Live chat / text widget** — some visitors won't call. Give them a way to message you instantly.
- **Sticky mobile CTA** — a "Call Now" button that stays visible as visitors scroll on their phone

- **Google Guaranteed badge** — apply for Google's Local Services Ads. The green checkmark badge is the ultimate trust signal.
- **Social media consistency** — post project photos 2-3x/week on Instagram and Facebook. Use local hashtags (#CypressTX #HoustonContractor)
- **Consider a warranty extension** — your 5-year warranty is solid, but competitors offer 10–15 year and lifetime. If your product supports it, a longer warranty is a strong selling point.

GROWTH MODE | COMPETITIVE EDGE | WHEN YOU'RE READY

YOUR QUICK-WIN CHECKLIST

Do These 10 Things This Month

No cost, no code changes, no waiting. These are the highest-impact actions you can take right now with what you already have.

#	ACTION	TIME	IMPACT
1	Claim & fully optimize your Google Business Profile	1 hour	Massive
2	Upload 10+ real project photos to GBP	30 min	High
3	Create your Google review link & save it to your phone	5 min	High
4	Ask your first 5 customers for Google reviews	Ongoing	Massive
5	Post your first GBP update (before/after photo)	10 min	High
6	Create a Facebook Business Page with consistent NAP	30 min	Medium
7	Claim your free Yelp business page	15 min	Medium
8	Register on Nextdoor as a local business	15 min	Medium
9	Start a Google Photos album for all job photos	5 min	Builds over time
10	Set a weekly reminder: "Post to GBP + upload 3 photos"	2 min	High (compounding)

You've Got the Foundation. Now It's Time to Build On It.

Your website is live and working. The next 90 days are about building the trust signals — reviews, photos, directory listings — that turn a great website into a lead machine. Every photo you take, every review you collect, every GBP post you publish is an investment that compounds over time. The competitors who dominate your

market didn't get there overnight. They got there by being consistent. You're starting with a stronger foundation than most of them had. Now go build on it.

GROWTH ROADMAP — APEX EPOXY & SURFACE SYSTEMS — MARCH 2026
